

# “EZ EMR”

EZ EMR is designed to allow users to login to view their current patients and orders. Once orders are complete, they can be checked off. The can also add new patients and orders to their list.

## 3 Features

- Users will be able to get a list of their patients and orders
- Users can check off completed orders
- Users can add new patients to their list

There are 26 items total, worth 5 points each. The max amount of points you can get is 100, so you only need to choose 20 items. The minimum passing score is 70 which would be 14 items.

Total Items Selected: 22

Total Points: 110

Items in red are **required**. Items in green are **additional items** I want to implement. You can use whatever colors you want, I just liked those ones.

### Planning

- project includes a wireframe for each view
  - <https://www.figma.com/file/Nq33dR6yQqcvLKgZddcSAM/EZEMR?type=design&node-id=0%3A1&mode=design&t=0frqiNWS83tMfPeD-1>
- project includes a list of MVP features \*
- project includes a data model
  - only include this if you are setting up a postgres database

### MVP

- app has at least 3 main features \*
- front end makes a request to the server and handles the response \*
- front end is interactive \*
- app has custom styling \*

### Front End

- app has at least 5 semantic tags \*
- app includes 1 view \*
- app includes 1+ additional view(s)

- styling includes flexbox
- at least 1 view is responsive
- styling includes animations

## Server

- app includes a GET endpoint and handler function \*
- app includes a POST endpoint and handler function \*
- app includes a PUT endpoint and handler function
- app includes a DELETE endpoint and handler function
- app utilizes Sequelize
  - like the data model, only use this if you're setting up a postgres database
- project includes at least 1 controller file

## Database

- project includes a seed file or function
- app uses 1 table
- app uses 1+ additional tables
- app uses a foreign key and join

## Presentation

- discusses project purpose and demonstrates MVP \*
- does not discuss broken/unimplemented features
  - this is extremely easy to get points for, just don't talk about that stuff in you demo
- recording is between 2-3 minutes
  - this is also easy to get points for since this time limit is technically required
